

Coelomycetes.org - Notes 1

With the publication of the extensive monograph on hyaline-spored Coelomycetes by Li et al. (2020) the first stage of a modern account of Coelomycetes has been advanced. The Coelomycetes.org website intends to keep abreast of all new genera of Coelomycetes and provide accounts of genera and species in one place. The monograph on dematiaceous coelomycetes was published by Wijayawardene et al. (2016) and updated the important monographs of coelomycetes by Sutton (1980) and Nag Raj (1993). If you would like to receive PDF files of Li et al. (2020) or Wijayawardene et al. (2016) please contact us at this website.
